COMPUTER TECHNOLOGIES

Company Profile

A Five Continents Group Company

About Us

FixIT Computer technologies L.L.C is the office automation division of the Five Continents Group, a 25 year old enterprise in the Middle East. The five continents group is a highly innovative and dynamic company that designs supply chain solutions for its multinational clients in the Middle East and Africa. We are a technology based consultant company with expertise for nearly 2 decades. The Fixit expertise maximizes your returns on your security investment, by implementing the best processes and methods for assessing, designing, implementing and supporting your information-centric security strategy.

Fixit's Professional Services organization delivers the expertise needed to achieve measurable improvements in security that aligns with your business objectives. Our experienced team works with our clients to tailor our services so they reflect their project scale and application-specific needs. With complete life cycle services to complement your in-house expertise and resources, Fixit delivers a seamless security experience.

We provide a full range of offerings for each critical step, helping you to speed deployment and enhance the value of your information security program.

Our Vision

Creating Value
Long – Lasting Partnerships

Our Mission

Create Secure Solutions

Deliver Tangible Benefits

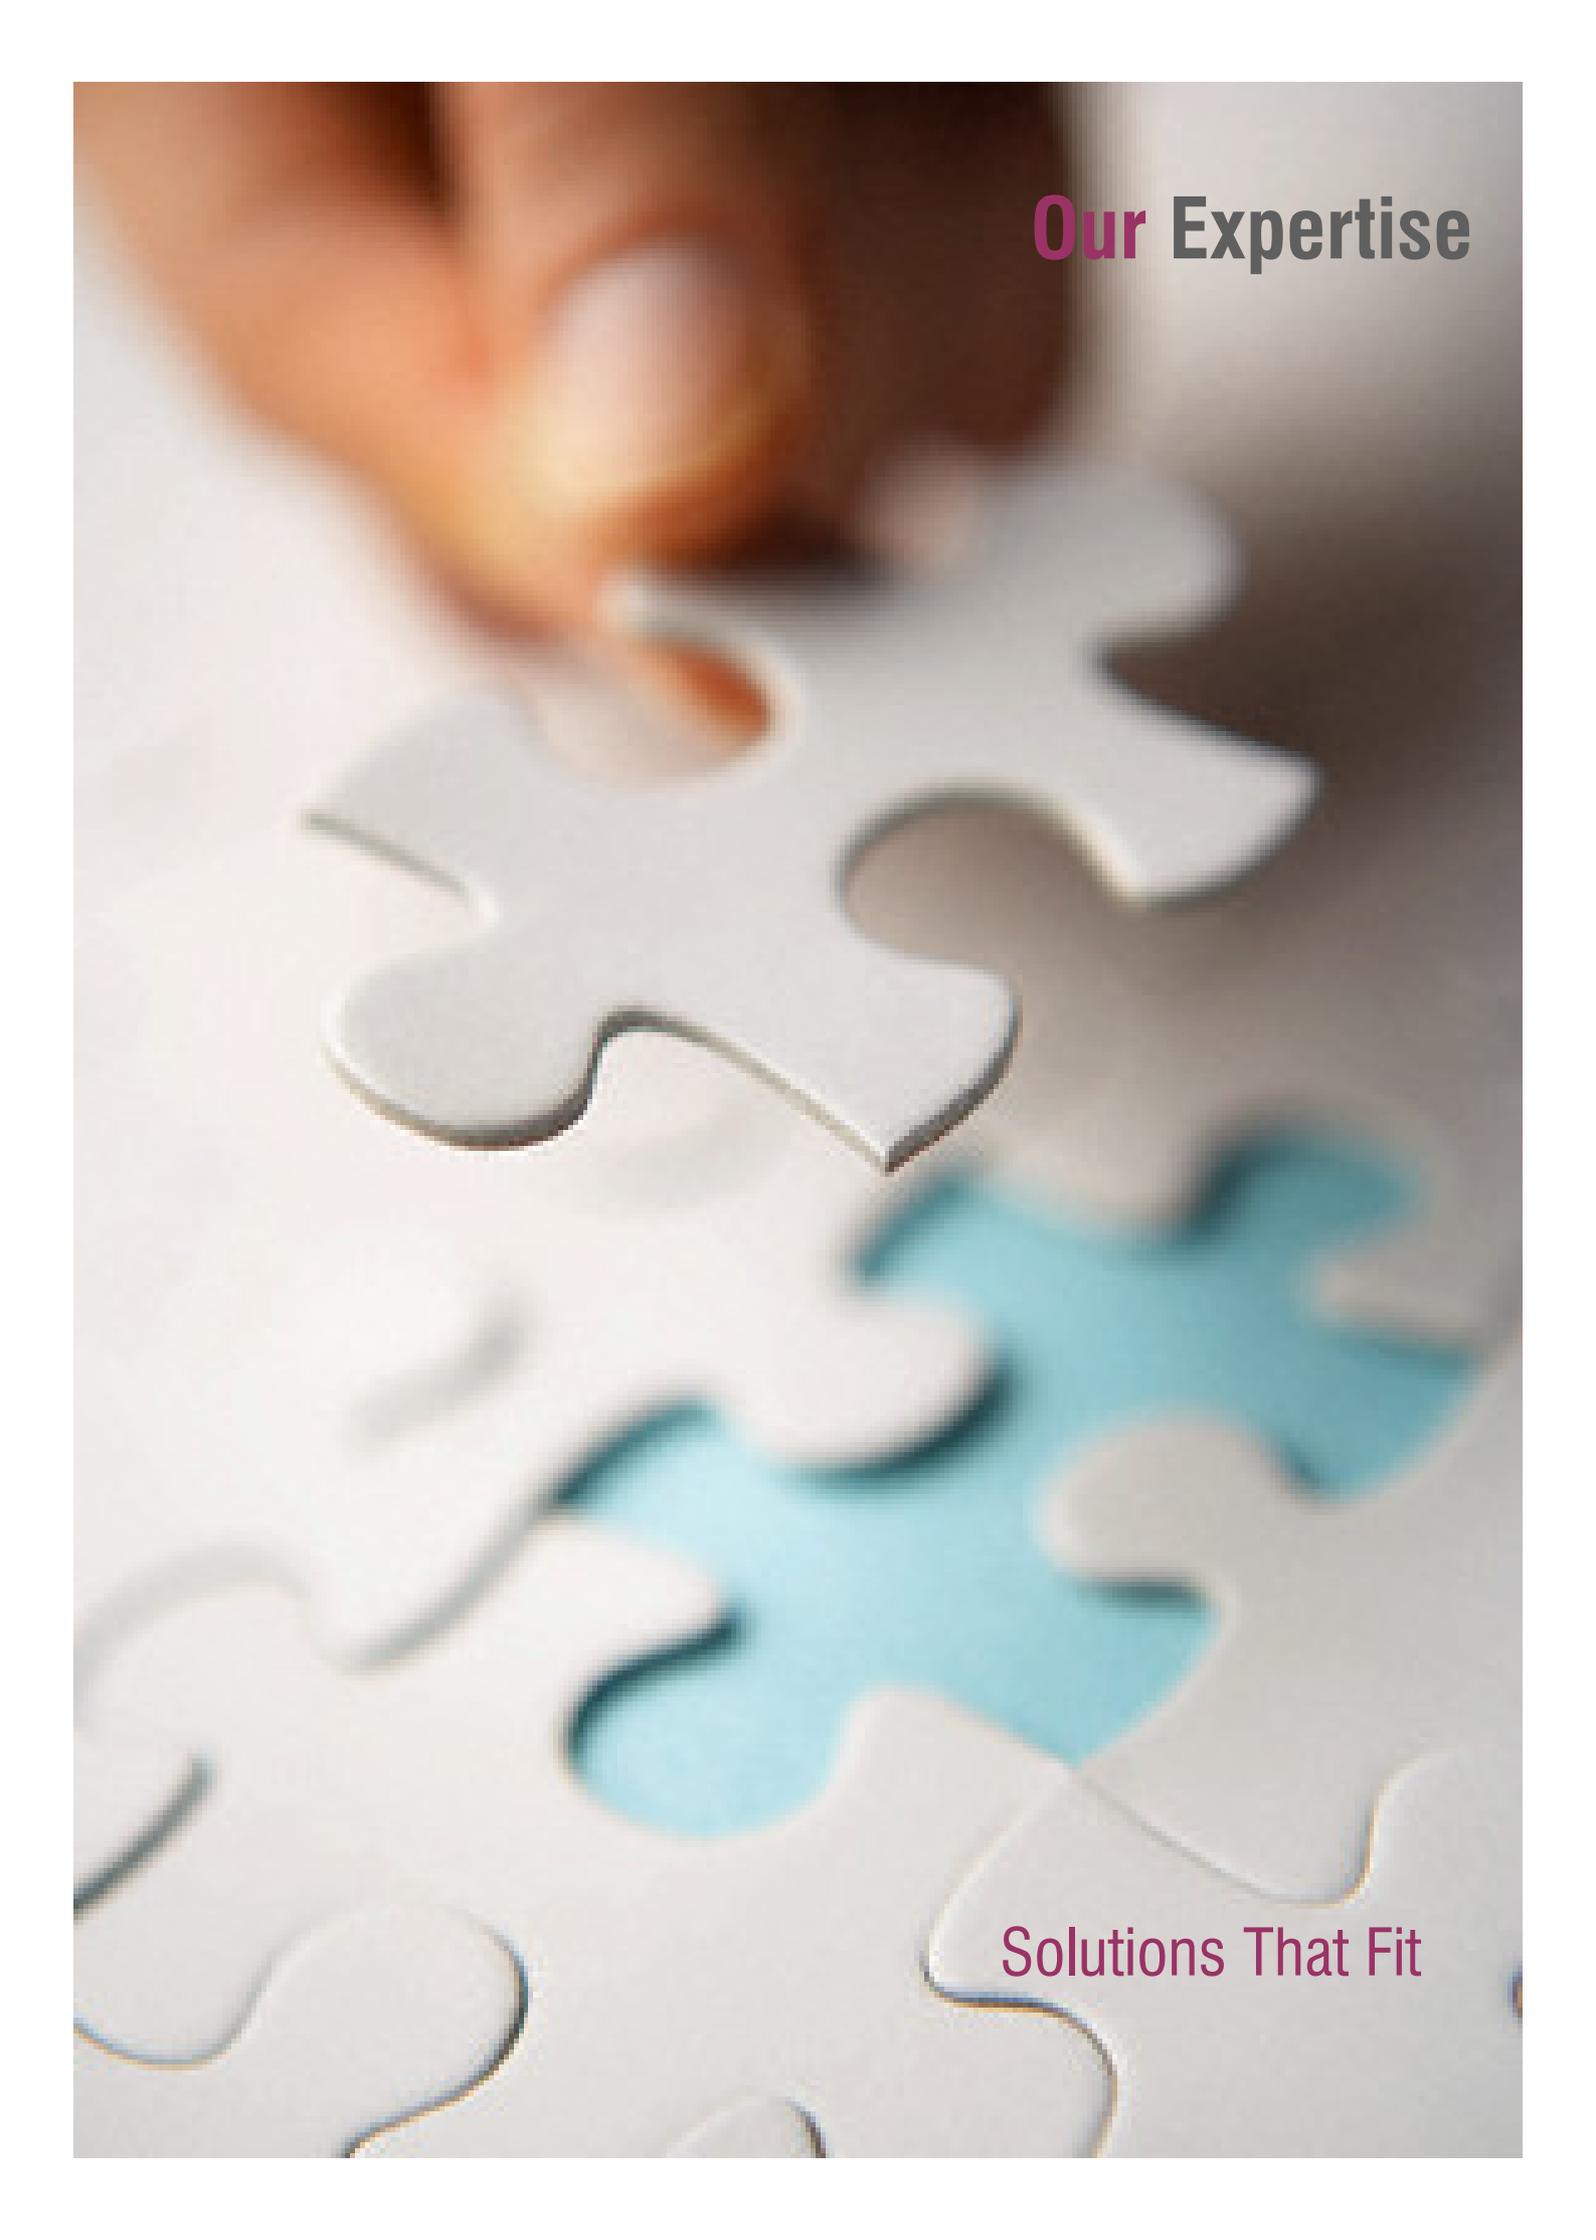

Integrate

Build trust

Develop transferable Knowledge

Facilitate Functionality

THE WORLD RUNS BETTER WITH F5.

As your internal networks are connected to other public networks, the risk of attack on your internal network is higher. Hence we treat security as an integral part of our solution offering and aiding in protecting the network from all possible attacks. Through our strategic alliance partners, we provide solutions that reflect global standards of quality and processes.

Our Solutions Include:

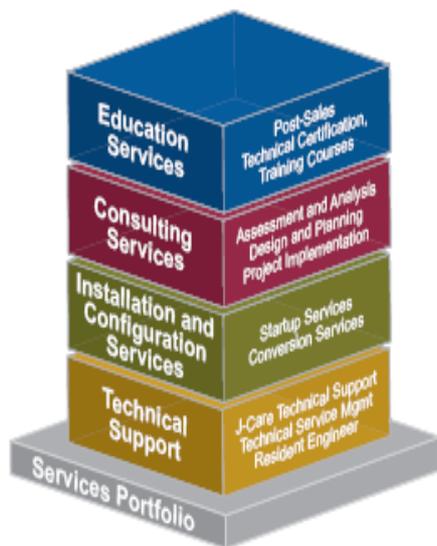

- Anti-virus, anti-spam, URL filtering to ensure content protection using technology products from Trend Micro, Symantec, Fortinet.
- Digital certificates to ensure data integrity and non-repudiation
- Tokens/Smart cards from RSA for strong authentication VPN and encryption to secure data confidentiality from Juniper
- Identity management to ensure access rights using products from CA, RSA
- Layered security deployment using IPS/IDS
- UTM solutions that integrate network firewalling, network intrusion detection and prevention, and gateway anti-virus.

Performance-Enabling Services and Support

Juniper Networks Service Portfolio offers performance-enabling services designed around a time-to-value experience that accelerates, extends, and optimizes the value of high-performance networking. This fuels a competitive advantage.

Consulting Services

Accelerate your network's value with our expert assistance

Education Services

Improve the productivity and self-sufficiency of your technical staff

Installation and Configuration Services

Start your high-performance, high-value network rapidly, confidently

Technical Support

Protect your high-performance business investment through operational assistance

Business Solutions

Enterprise Solutions

- Access Control
- Adaptive Threat Management
- Application Acceleration
- Compliance
- Data Center Infrastructure
- Microsoft Applications
- Oracle Business Applications
- Remote Access
- SAP Application Acceleration
- Voice Over IP
- VPNs and WAN Evolution

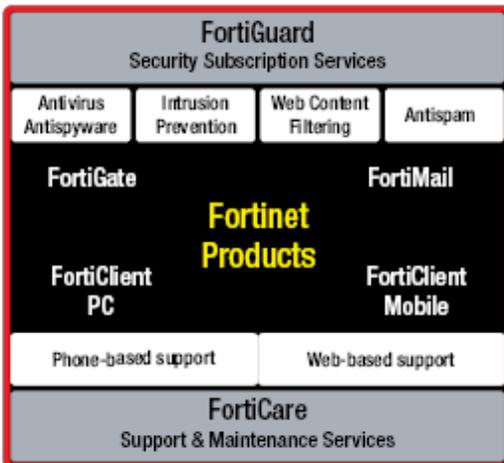

Industry Solutions

Top service providers, large government deployments and most of the Fortune 100 are among the demanding businesses that rely on Juniper Networks purpose-built, high-performance IP platforms. Customers know that Juniper Networks proven solutions solve highly complex, fast-changing problems in the most demanding networks.

Security Solutions

FORTINET.

- FortiGate UTM
- FortiMail Email Security
- Fortinet Centralized Management Software
- FortiClient End Point Security
- FortiGuard Subscription Services
- FortiCare Support Service

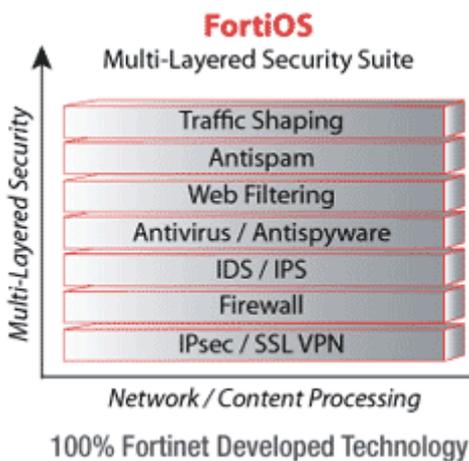

FortiGate UTMs (Unified Threat Management)

- MSSP & Large Enterprise
- Carriers
- Enterprise
- SOHO & SMB

FortiMail Email Security

- Increasing employee productivity by reducing unwanted spam messages.
- Reducing the consumption of mail system and network resource consumption caused by spam messages.
- Addresses content level threats that utilize email.
- Aiding in achieving regulatory compliance through advanced email content archiving and routing.
- Providing flexible deployment options with three modes of operation: Transparent, Gateway and Server.
- Reducing IT resources needed by utilizing turn-key purpose-built hardware platforms, tightly integrated management, logging and reporting, and fully automated security content updates.
- Evergreen protection updates through Fortinet's own FortiGuard Subscription Services.
- Lowered operational expenses through Quick-Start Setup Wizard and Basic-mode GUI.

FORTINET.

- FortiGate UTM
- FortiMail Email Security
- Fortinet Centralized Management Software
- FortiClient End Point Security
- FortiGuard Subscription Services
- FortiCare Support Service

Fortinet Centralized Management Software

- FortiManager Centralized Management
- FortiAnalyzer Centralized Reporting
- FortiGuard Analysis and Management Service

FortiClient End Point Security

FortiGuard Subscription Services

- FortiGuard Antivirus
- FortiGuard IPS
- FortiGuard Web Filtering
- FortiGuard Antispam

FortiCare Support Service

- FortiCare Technical Account Management Services
- FortiCare Professional Services

THE WORLD RUNS BETTER WITH F5.

- Application Delivery
- Disaster Recovery
- Application Performance
- Application Security
- Access Control
- Data Center Consolidation

Application Delivery

F5 is the only vendor that offers a unified architecture that resolves the multiple issues involved in application delivery. The F5 approach makes the entire network application aware. This lowers costs by streamlining and centralizing management, and by eliminating the need for multiple point products.

Disaster Recovery

F5 is the only vendor that virtualizes data centers, VPN access, optimization, and traffic in an integrated way. No other vendor can offer the same combination of simplicity, flexibility, and control. F5s SSL VPN is easier to deploy and use than IPSEC, and we can deliver availability and performance that matches the specific needs of your organization.

Application Performance

F5 is the only vendor that simplifies acceleration and availability for both private and public users under a single management framework. Using the iRules technology, F5 are also the only vendor that can provide network-based application logic and optimization. F5 reduce unnecessary protocol communication across the network, and we offer the only full universal translation capabilities.

Application Security

F5 offers a positive security model that is unique in the industry. You get better infrastructure performance, zero-day protection out of the box, and lower costs compared to coding for applications individually.

Access Control

F5 is the only vendor that offers a comprehensive approach to access control, regardless of end user, client type, application, access network, or network resources. We also integrate access control with your application delivery architecture to simplify management and reduce costs.

Network Solutions

- WAN / LAN / WLAN / VPN
- WIFI
- District WIFI

Network Solutions

WAN / LAN / WLAN / VPN

Networks play a critical role in any IT infrastructure and there is a need to ensure that the networks are available 24/7 as business is carried out online today. Whether it is implementation of new network / upgrading of bandwidth or troubleshooting, we deliver network optimization solutions that create a smooth and secure workflow environment for your business.

We provide traditional as well as state of the art network infrastructure solutions. This can be wired networks, wireless network and resource optimization. We provide solutions from world renowned Network companies

Storage Solutions

Storage Solutions

- SAN/ NAS

Storage Solutions

SAN & NAS

We offer cost-effective, complete storage solutions for space-conscious environments, including custom-designed hardware, IP storage and network attached storage (NAS) software, custom designed backplanes with IPMI support and enclosure management controllers.

We offer cost-effective, complete NAS storage solutions for space-conscious environments, including custom-designed hardware and network attached storage (NAS) software. Network Attached Storage (NAS) is perfect for workgroups or departments. NAS appliances are a reliable way to manage and store valuable business data without complexity. Our NAS software is easy to install and enables an administrator to coordinate all functions relating to discovery, management, tracking and planning for future storage growth.

Backup Solutions

Backup Solutions

• TAPE BACKUPS / AUTOLOADERS / MEDIAs

Backup Solutions

Data Backup and Disaster recovery Solution

If you've ever had a flat tire, you can certainly appreciate why your car came equipped with a spare tire. And even if you've been lucky enough to never have a flat, you probably still appreciate the value of having a spare in your trunk. How comfortable would you be driving without a spare tire?

It's obvious that having a backup is essential, especially in network environments where critical data is used and stored.

Tape Backup

Usually the small and medium companies would look for cheaper solutions to store their data. Most of them go for DVD or CD copy. A lot of people use HDDs for backup.

When come to critical backups the "reliability factor" is tossed up into fight. However, considering the reliability, one will agree that the tape backup is the best option.

Tape Automation

Autoloaders are used where the size of the data to be backed up is more than the size of a single tape. We supply and install variety of such systems that can backup from 400GB to 100TB.

Tape Media

Tapes are available with us ranging DDS, DLT, SDLT, VXA, Magnus, SLR, TRAVAN, LTO etc.. In other words tapes to contain 4GB to 1.6TB on a single tape.

Hardware & Integration Solutions

Hardware Solutions

- Servers
- Desktops / Laptops / Printers / Plotters / Consumables
- Power Solutions (UPS)
- PABXs / IP PABXs / VoIP's
- Display Cards & Memory Cards
- Optical Drives / Hard Drives / Tape Drives

Hardware Solutions

Desktops / Laptops / Printers / Consumables.

FixIT provides and maintain a unique set of work instructions and documentation for each configuration ordered. This assures that every system shipped under the unique configuration will be consistent, reducing technical support issues. We deal in products of most of the internationally accepted brands.

Power Solutions

FixIT provides innovative products that are engineered for ease of use through standardized, modular components, allowing you to act quickly and keep pace with today's rapid business change. We partner with world leaders like APC and MGE for power solutions that will keep your business running seamless.

PABXs / IP PABXs / VoIP's

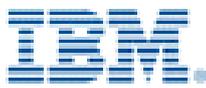

FixIT provides reliable network infrastructure products and services. Focussing on proven secure solutions, we deliver a competitive edge to customers who range from innovative small businesses through to major on-line service providers. Experts in building converged networks, we enable flawless communication through our world class PABXs, IP based voice and data equipment.

Enterprise Management Solutions

Enterprise Management Solutions

- Server and Database Management
- Network management
- Application management:
- Desktops management
- Performance management
- Storage management

Enterprise Management Solutions

IT infrastructure requirements for enterprises have grown along with the market dynamics reflected in different environments. Managing heterogeneous infrastructure, monitoring WAN/LAN links, enterprise wide applications, automation applications and web-enabled services can entail increased expenditure on resources and time consumption

Partnering with leaders in this segment such as CA, HP, IBM, we provide technology customised enterprise management solutions to our customers. Our offerings include implementation, development and post-implementation support and enhancement for your enterprise.
